
About this document

This document provides a high-level description of the three serial data interface (SDI) cards that are used in the Meridian 1 system:

- NT8D41AA Serial Data Interface (SDI) Paddle Board
- NT8D41BA Quad Serial Data Interface (QSDI) Paddle Board
- QPC841 Quad Serial Data Interface (QSDI) Card
- QPC513 Enhanced Serial Data Interface (ESDI) Card

To aid you in understanding these boards, this manual provides the following reference material at the back of the book:

- LAPB data link control protocol
- List of terms

References

See the *Meridian 1 planning and engineering guide* for:

- *Spares planning* (553-3001-153)
- *Meridian 1 equipment identification* (553-3001-154)

See the *Meridian 1 X11 input/output guide* for a description of all administration programs and maintenance programs. Refer to *Meridian 1 X11 system messages guide* for a description of system messages.

See *Meridian 1 system installation procedures* (553-3001-210) in the *Meridian 1 System installation and maintenance guide* for a description of the serial data interface cross-connections and cabling.
